

KIRAN CHAND S

Software Engineer | Full Stack Developer | React • Next.js • Python

Contact: +91 8848314304 | kiranchand.0987@gmail.com | Trivandrum | [linkedin.com/in/kiranchand-s](https://www.linkedin.com/in/kiranchand-s) | github.com/kiran-atcore

PROFESSIONAL SUMMARY

B.Tech Computer Science graduate and full-stack developer with hands-on experience building scalable web and mobile applications using Next.js, React Native, Python, and Django REST. Adept at designing REST APIs, real-time WebSockets, automated CI/CD-like cron workflows, and utilizing cloud technologies (AWS). Passionate about integrating AI models into practical business solutions, optimizing performance, and building responsive, user-centric software.

SKILLS

Languages: Python, Java, C, JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, React Native (Expo), Bootstrap, Framer Motion

Backend & DB: Django, Django REST Framework, PostgreSQL, Supabase, Redis

Tools & Cloud: Git, GitHub, AWS (EC2, S3, RDS, Lambda), Amazon Bedrock, SageMaker, Groq, OpenCV

Concepts: REST APIs, MVC, Machine Learning Basics, WebSockets, Cron Jobs, System Architecture

EXPERIENCE

Full Stack Developer Intern | *Alpha Innovation, Trivandrum*

June 2026 – August 2026

- Architected and deployed **DispatchR**, an automated reporting web application utilizing Next.js and Django REST, streamlining multi-source data ingestion for over 50+ reporting endpoints.
- Engineered dynamic PDF generation utilizing ReportLab and implemented cron-scheduled automated email distribution, reducing manual reporting time by 75% and accelerating cross-team data delivery.

Live Demo: dispatchr-reporter.vercel.app

EDUCATION

Bachelor of Technology, Computer Science & Engineering

2022 – 2026

University College Of Engineering Kariavattom(UCEK), Trivandrum

PROJECTS

DeepFake Detection App – AI-Powered Media Authenticator

Tech Stack: Next.js, Django, DRF, OpenCV, XceptionNet

Developed an AI-powered media authenticator integrating a fine-tuned XceptionNet model with robust confidence scoring. Processed 100+ media requests via a historical tracking dashboard, improving platform reliability by 40%.

GitHub: github.com/kiran-atcore/DeepFakeDetection

AI Interview Practice App – Intelligent Mock Interview Simulator

Tech Stack: Next.js, Django, Groq, Google TTS, Piston API

Built a mock interview simulator supporting 15+ concurrent sessions with sub-second latency conversational AI. Designed a live code editor (Piston/Monaco) and dynamic PDF feedback, boosting user preparation efficiency by ~60%.

GitHub: github.com/kiran-atcore/AiInterviewPracticePlatform

Vicinio – Local Worker Finder (Geolocation Mobile App)

Tech Stack: React Native, Expo, Django, PostgreSQL, WebSockets

Developed a geolocation mobile app connecting 50+ local workers/customers with interactive radar maps. Integrated a live WebSocket chat and admin dashboard with multi-strike ban mechanics, securing 100% of user transactions.

GitHub: github.com/kiran-atcore/LocalWorkerFinderApp

Live Demo: drive.google.com/file/d/10BrKVremhE2PoB2JNfGaSQBHBBeE0Z2Q0/view

CERTIFICATIONS

- AWS:** Cloud Practitioner, Gen AI Practitioner, Certified Developer Associate.
- IBM:** Web Development & CyberSecurity Fundamentals.
- Databricks:** Agentic AI & Prompt Engineering Fundamentals, MLOps.
- HP Life:** Data Science & Analytics, AI Fundamentals
